

Press Release

Europe-wide Cooperation...

...between Sungrow & Solar-Log™

Sungrow, the global leading inverter solution supplier for renewables and Solar-Log™, one of the leading companies in PV Monitoring, Smart Energy and Feed-in Management will cooperate in several European countries which are key markets for both companies – among others Italy, France, Germany, Spain and Netherlands.

Munich/Geislingen-Binsdorf, May 28, 2019: The two companies will jointly bring interaction between professional monitoring and energy management as well as innovative PV inverter technology to the next level by offering price-competitive monitoring solutions—inclusive of hardware and software.

Starting this spring, Sungrow and Solar-Log™ present a sales package including latest inverter technology, efficient monitoring solutions consisting of Solar-Log™ hardware and free 5-year usage of Solar-Log WEB Enerest “L” Software Option.

"The cooperation with Solar-Log™ offers an abundant added-value package to our customers including a state-of-the-art complimentary Solar-Log™ monitoring portal", said Stefan Froböse, Technical Director, Sungrow EMEA.

"Sungrow is an industry leader and valued partner for us in the area of PV inverter technology. The company understands the value proposition of a professional monitoring and energy management system in combination with a high-efficiency PV inverter. We are delighted to support Sungrow's activities in several European countries by offering our products and solutions", said Jörg Niche, Chief Sales Director of Solar-Log™.

Press Release

Europe-wide Cooperation between Sungrow & Solar-Log™

Solare Datensysteme GmbH (SDS)

Solare Datensysteme GmbH (SDS), based in the German city of Geislingen-Binsdorf, is one of the leading companies in the areas of smart energy, feed-in management and PV monitoring with global service for operators and installers. Since August 2015, SDS is a subsidiary of BKW AG (Bern, Switzerland) – a global company for energy and infrastructure with more than 7,000 employees.

SDS has developed and distributed their Solar-Log™ product range since 2007, currently installed in 134 countries – monitoring more than 296,000 plants with a total output of 13.62 GWp. Solar-Log™ is compatible with 130 different component manufacturers and more than 2300 different inverter models. SDS solutions make an important contribution to the successful integration of renewable energy into an intelligent power grid and help to make the successful transition to clean energy a reality.

More information about the company can be found at www.solar-log.com.
