

Proactive integration of renewable energies into smart power grids.

Make an active contribution towards the transition to clean energy and help to protect the environment.

Solare Datensysteme GmbH (SDS) and BKW Energie AG are globally successful companies in the field of energy and energy management. SDS focuses on software development for solar monitoring, Smart Energy and feed-in management. BKW holds a leading position in wind energy.

Our vision is to make the digitalization of renewable energy sources a reality. We would like to reach our goal together with you.

We are looking for a
Software Developer - Web - Renewable Energies (m/w)
to join our developers team in Berlin

Your tasks

- Develop new program functions and front-end design for our visualization, monitoring and control solutions. Over 100,000 photovoltaic plants and other renewable energy systems are connected to our Cloud solutions.
- Maintain existing web applications and develop tools
- Technical contact in third level support
- Create documentation

You have

- a degree in computer science or training as a qualified IT specialist
- experience in software application development
- at least two years of professional working experience
- good knowledge of PHP 5 with sound object-oriented programming (OOP) skills

- practical experience with MySQL databases, HTML, CSS and JavaScript
- Very good command of written and spoken English

Your talents and strengths include

- Holistic approach
- Independent and structured approach to work
- Team player

We offer you

You will work in an innovative environment with opportunities for further advancement and will have an attractive basic income with a target-based bonus. You will work in an attractive modern working environment in the middle of Berlin at an internationally active group of companies that you will be able to actively shape the project success.

Have we sparked your interest?
