

## Solar-Log WEB Enerest™

## **Billing Portal**

We strongly recommend to constantly follow the "3 months preview" on your portal. This overview does include the information which PV plant will be listed in the invoices for the coming 3 months. Should you (or your customer) do not plan to renew the Solar-Log WEB Enerest<sup>™</sup> service for a specific PV plant, you have the possibility to set a cancellation date or to deactivate the PV plant immediately.

## The difference between the mentioned possibilities

- Deactivating a PV plant -> The service will be discontinued immediatelly. Already paid time periods will not be refunded.
- Setting a cancellation date -> The service will automatically be discontinued on the last day of the paid period. We recommend this possibility to make use of the already paid time period.
