

Do it for
your future!

Product Owner (m/f/d) – SaaS

Remote | Full-time | Permanent

Solar Log GmbH is a leading provider in smart energy management systems. Our platform, Solar-Log WEB Enerest™, connects PV installations worldwide with powerful software to monitor and manage energy flows efficiently, sustainably, and intelligently. Join us in shaping the energy transition—digitally, innovatively, and globally.

We are looking for YOU as Product Owner (m/w/d) to take charge of our SaaS platform—driven by agile software development, customer-centric thinking, and a desire to create meaningful solutions for a sustainable energy future.

What awaits YOU

- Own product development for Solar-Log WEB Enerest™ and manage the product backlog
- Lead with a customer focus—translate stakeholder needs into clear, actionable backlog items
- Collaborate cross-functionally with UX, QA, development teams, and Senior Product Manager
- Drive agile culture—support sprints, act as a sparring partner, and improve processes continuously
- Think strategically—evaluate options and make informed technical and business decisions

What YOU bring

- Experience as a Product Owner or similar role in agile (Scrum) environments
- Solid background in requirements engineering, backlog prioritization, and planning
- Ability to guide and challenge cross-functional teams
- Excellent communication skills—able to convey technical concepts clearly
- Strong self-organization, accountability, and curiosity about energy and digital technologies
- Very good English, good German skills advantageous

What WE offer

- Remote work & flexible hours for optimal productivity
- 30 vacation days for the best work-life balance
- Company health insurance for your well-being
- Eco-friendly EV charging stations powered by renewable energy
- Family-oriented, international environment with short decision paths and creative freedom
- English courses, ongoing training & career development
- JobRad leasing, corporate benefits, pension plan & asset-building allowances
- A future-proof job that makes a real impact

Ready to help shape the energy transition?
