

Do it for
your future!

At Solar-Log GmbH, we design digital solutions that drive the global energy transition. Our portfolio spans the mobile app “Enerest ToGo”, customer APIs, automations, and third-party device integrations.

To keep these services seamless and future-proof, we are looking for YOU: a technically minded Product Owner who understands interfaces, connects systems, and creates smart digital services.

Product Owner (m/w/d) – Digital Services

Remote • Full-time • Permanent

Your Mission

- Own our Digital Services: app, API, automations, integrations
- Bridge tech & business: speak with developers at eye level while understanding customer needs
- Shape new features: from idea to evaluation to delivery
- Backlog ownership: prioritize, structure, and communicate transparently
- Integrate external partners with internal development for stable and scalable results

Your Profile

- Experience as a Product Owner in a technical environment (APIs, automations, integrations, mobile apps)
- Technical understanding of interfaces, data flows, and modern software architectures
- Background in requirements engineering, stakeholder management, and agile methods
- Communicative, analytical, decisive personality
- Very good English skills – daily working language
- Good German skills advantageous, but not required

What We Offer

- Remote work & flexible hours – shape your own workflow
- 30 vacation days – for work-life balance
- Company health insurance – at no cost to you
- EV charging stations powered by 100% renewable energy
- Family-like, international, and innovation-driven culture
- English courses, professional development, and training programs
- JobRad leasing, corporate benefits, pension plan & asset-building allowances
- A future-proof role in an industry that really matters

Ready to digitize the energy transition?

We look forward to your application!
